APPLICATIONS DEVELOPED

Final Transmissions - *An Augmented Reality Storytelling Application*

- Used **AR.js** built on **A-Frame webGL objects and vanilla JavaScript** to render 3D objects dynamically to the a user's phone camera view once they enter range of a specific latitude/longitude coordinate using **geolocation and marker-based activation**.
- Created an immersive ghost story experience, complete with voice narration, proximity-activated musical cues, and theme-based augmented reality animations.
- Product owner and project manager of creative team project built with **Node.js, MySQL, passport.js, pug templating, and APIs.**

Loot Cave - *A Dungeon-Crawl Memory Game*

- Used **React, Redux, JavaScript and CSS with Flexbox** to build a card game in which a player must correctly match cards to find treasure and defeat a dragon.

Next Meal OC - *A Soup Kitchen Finder for Orange County's Hungry & Homeless*

- Used **JavaScript, jQuery, PHP, MySQL, APIs, and Bootstrap** to build a user-friendly, completely mobile-responsive search tool to encourage struggling Orange County residents to supplement their meals with free alternatives.

PROFESSIONAL EXPERIENCE

Pathways of Hope — *Case Manager, Emergency Shelter*   Fullerton, CA: 2016 - 2017

- Provided case management for 12 families experiencing homelessness at an emergency shelter.
- Found housing, career resources, financial resources, and medical support for families.
- Updated the Homeless Management Information System (HMIS) with case notes and family data.

Job Path, Inc. — *Coordinator of Community Supports*   New York, NY: 2013 - 2016

- Promoted twice within company, from direct support worker to specialist to coordinator
- Coordinated services for 12 adults with developmental disabilities, including Autism and IDD
- Hired, trained, and managed a staff of 25 Direct Support Professionals
- Found resources for accessible technologies, especially for people with visual and dexterity challenges
