TECHNICAL SKILLS

Strong: JavaScript (ES5 / ES6) + jQuery, React.js + Redux, Data integrations and APIs , HTML5 / CSS, BootStrap / Materialize / Flex, Debugging via Chrome Dev Tools, Git / GitHub, Augmented Reality (AR.js, Aframe)

Experienced: PHP, MySQL / Firebase, Local Environment Setup (MAMP), Regular Expressions (Regex), Data Templating (Pug), Cloud Computing (AWS EC2)

APPLICATIONS DEVELOPED

Final Transmissions — *An Augmented Reality Experience*   LIVE   GITHUB

- Used AR.js and Aframe to display 3-dimensional models and overlay the images on a user's cell phone camera display when user entered proximity to an AR encounter
- Full ideation and project design via agile methodologies, as well as extensive problem solving
- Used Node.js with Express and MySQL for storing and transmitting data to client, Pug Templating to expedite user data conveyance, JavaScript and Axios for client logic, and Augmented Reality and Google Maps to present visual cues to user

Loot Cave — *A Web-Based Version of Concentration Game*   LIVE   GITHUB

- Used React.js with Redux to build reusable application components and communicate between them
- Created flexible, mobile-responsive design and layout using CSS and Flex
- Added extra features to game logic for varied game play

Next Meal OC — *Orange County's Soup Kitchen Finder*   LIVE   GITHUB

- Designed and coded mobile application to help Orange County residents experiencing homelessness or financial insecurity gain greater access to food resources
- Used JavaScript and jQuery along with CSS and Bootstrap 3 to program an interface with a focus on ease of use.
- Utilized PHP and MySQL to access meal center data via AJAX calls from the client side
- Leveraged Geocoding and Google Maps APIs to provide location and map data to the user

PROFESSIONAL EXPERIENCE

Web Developer / Instructor — *Freelance*   2017 - pres.

- Building multi-page website for client using React.js with Redux for reusable and stateful user interfaces
- Contract instructor for LearningFuze web development students, teaching JavaScript fundamentals

Case Manager — *Pathways of Hope*   2016 - 2017

- Certified Homeless Management Information Systems (HMIS) user. Updated HMIS database with housing status, demographics, case notes, and resources offered. Attended monthly meetings and initiatives for increasing HMIS ease-of-use for social workers and increasing data quality

EDUCATION

California State University, Long Beach — *Master's Degree, English*

California State University, Long Beach — *Bachelor's Degree English*
